Dear \_\_\_\_\_

The Arctic Refuge is an irreplaceable wilderness, and a home to birds, grizzlies, rare muskoxen, polar bears, and other wildlife. The coastal plain of the refuge is also the birthing and nursery ground for the 130,000 member Porcupine Caribou herd, one of the hemisphere's largest caribou herds. The Gwich'in Indians, one of the last subsistence cultures, depend upon the caribou for food and as the foundation of their culture and traditions.

Please consistently vote to protect the coastal plain of the Arctic Refuge.
